## DOES YOUR BUSINESS VALUE INNOVATION AND PRODUCT DEVELOPMENT?

DRIVE THE FUTURE HEALTH OF YOUR BUSINESS, AND YOUR ABILITY TO COMPETE ON MORE THAN JUST PRICING, THROUGH PRODUCT INNOVATION.

Don't let your business become stagnant. Focus on the future while allowing your 'Product Improvement Team' the flexibility to grow, in our results oriented environment. Identify the right team, who can deliver projects on time and on budget with a spark for creativity, and we will help to facilitate the rest.

Use the FabLab as an extension of your business. If your equipment is used to capacity, use the FabLab as a satellite location. We are open 24/7/365. We never close.

Discover new revenue streams and efficiencies for your business through exposures to new digital equipment and technology, without having to purchase the new equipment and house it yourself. Produce your jigs and fixtures for new cost effective processes.

Have your employees trained and mentored by a wide variety of advanced manufacturing industry professionals who work collaboratively in the FabLab environment. Surround them with out-of-the-box thinkers who thrive in solving manufacturing solutions.

Connect with industry and entrepreneurs. Our FabLab is home to a diverse array of industries including: aerospace, communications, healthcare, construction, additive manufacturing, carpentry, welding, sports, art, entertainment, and more.

Our FabLab is SAFE Work Certified and home to CNC Wood, CNC Metal, a waterjet cutting table, laser cutters, 3D printers, IoT room (for custom circuit boards), painting room, industrial sewing machines, vinyl heat press, and much more.
